Device auto-updates

Here's a guide on how to set up automatic operating system updates and enhance your security on both iPhone (iOS) and Android devices:

For iPhone (iOS) devices:

1. Open the 'Settings' application on your iPhone.
2. Scroll down and tap 'General'.
3. Tap 'Software Update'.
4. Tap 'Customize Automatic Updates'.
5. Here, you'll see two options: 'Download iOS updates' and 'Install iOS updates'. You can choose to automatically download updates over Wi-Fi and install them manually later, or you can choose to have them install automatically.

For Android devices:

1. Open the 'Settings' application on your Android device.
2. Scroll down and tap 'System'.
3. Tap 'Advanced' to expand the list of options.
4. Tap 'System Update'.
5. Tap 'Auto-update options'.
6. Choose from the options: 'Don't auto-update apps', 'Auto-update apps at any time. Data charges may apply', and 'Auto-update apps over Wi-Fi only'. It's recommended to choose 'Auto-update apps over Wi-Fi only' to save your data usage and update apps only when you're connected to a Wi-Fi network.

Setting up automatic updates for all your apps is a key part of maintaining security. Here's how you can do it on iOS and Android devices:

For iPhone (iOS) devices:

1. Open the 'Settings' application on your iPhone.
2. Scroll and tap on 'App Store'.
3. Under the 'Automatic Downloads' section, switch on the toggle for 'App Updates'. Your device will now automatically update your apps whenever updates are available.

For Android devices:

1. Open the 'Google Play Store' app on your Android device.
2. Tap on the three horizontal lines (Menu) at the top-left corner.
3. Tap 'Settings'.
4. Tap 'Auto-update apps'.
5. Choose from the options: 'Don't auto-update apps', 'Auto-update apps at any time. Data charges may apply', and 'Auto-update apps over Wi-Fi only'. It's recommended to choose 'Auto-update apps over Wi-Fi only' to save your data usage and update apps only when you're connected to a Wi-Fi network.

These steps help ensure that your apps and operating system are always up-to-date, reducing the risk of security vulnerabilities. These steps may vary slightly depending on your device and its operating system version. If you encounter any difficulty, consult the user manual or support website for your specific device model.

Also, ensure you only download apps from trusted sources – for iPhones, this is the App Store, and for Android devices, Google Play Store is the recommended source.
